

Hi,

I am excited to submit my application for the Android Developer position in your company. I believe my skills and background will help me quickly exceed expectations for this role.

Constantly updating my skill set, I am proficient in the latest iterations of Kotlin, Java, PHP and C++. I have spent the past three years at Android development, my main responsibilities revolved around building cutting-edge mobile applications, testing and debugging applications and developing updates to improve app usability. I also collaborated with the marketing department to help define client needs and how best to accommodate them. I have been involved in the entire lifecycle of Android app development. Among my responsibilities are to solve problems, debug apps, develop SQL database structures and participated in new product development. Exceeded customer's needs, improving app functionality and focusing on object-oriented design and well-regarded for writing efficient, reusable code that prioritizes security

My skills and experience in designing and developing applications for Android devices will be of great benefit for your company. I'd love to discuss the further role with you.

Here some of my professional highlights:
